

DUKE PERIOPERATIVE MEDICINE FELLOWSHIP

in collaboration with **University College London**

2-for-1: Complete a master's and perioperative medicine fellowship at the same time!

The Duke Perioperative Medicine Fellowship concomitantly enrolls trainees in an MSc in perioperative medicine at University College London. The fellowship provides an internationally-recognized qualification and uniquely equips fellows to pioneer progress in this new field.

Now accepting applications
for this **interdisciplinary,
transatlantic** fellowship in
perioperative medicine!

DUKE UNIVERSITY MEDICAL CENTER

UNIVERSITY COLLEGE LONDON

START DATE: AUGUST 2021

PROGRAM DIRECTOR
JEANNA BLITZ, MD

- Associate Professor of Anesthesiology
- Medical Director, Preanesthesia and Surgical Screening (PASS) Clinic
- Vice President, Society of Perioperative Assessment and Quality Improvement

**MEET OUR
INAUGURAL FELLOWS**

**ELENA KOEPKE,
MD, MBA**

**DAVID WILLIAMS,
MD, MPH**

APPLY TODAY!

- Resident physicians are encouraged to apply in their CA-2 year
- Open to all trainees who have completed their professional exams
- Entry is by competitive interview

**OBTAIN AN INTERNATIONAL
CERTIFICATION IN PERIOPERATIVE
MEDICINE FROM UCL**

Fellows will be enrolled in UCL's master's program in POM which provides distance learning to earn a postgraduate degree in one year. This innovative, online course is taught by faculty from UCL, Duke University and abroad. Fellows will assume a supervised personal research project.

LEARNING MODULES

- The Landscape of Perioperative Medicine Towards a New Model in Perioperative Care
- Data and Statistics in Perioperative Care
- Quality, Safety and Leadership in Perioperative Care
- Perioperative Pain and Cancer Disease
- Perioperative Issues for an Aging Population

**DURING A TWO WEEK
VISIT TO UCL**

Fellows will experience POM in a different healthcare system while interacting with mentors and fellows from UCL. Fellows will also have the opportunity to attend the Evidence Based Perioperative Medicine Conference (www.EBPOM.org).

Perioperative medicine (POM) emphasizes the care of patients from the time surgery is contemplated to full recovery. Anesthesiologists are uniquely positioned to touch each phase of this new pathway of care. The Duke POM Fellowship is a collaboration with University College London and provides a unique opportunity for anesthesia trainees to reach outside the operating room to gain academic, clinical and research expertise in POM.

The role of an anesthesiologist is being redefined and with that comes the need for new skill sets and training in POM. The curriculum includes rotations with all services in Duke's comprehensive and innovative Perioperative Enhancement Team (POET), as well as the opportunity to become an expert in Point-of-Care Ultrasound (POCUS).
